No. 145-B/36.

Station Madras., *Dated the* 30th August 1937.

From (Name) L.B. Green, Esq., M.B.E.,
(Designation) Director of Industries,

To The Secretary to the Government of Madras,
Development Department.

Sir,

Reference: G.O.No.Ms.206 Development dated 12th February 1936.
G.O.No.Ms.1182-Development dated 21st July 1936.

Out of the six power drills ordered to be withdrawn from service and disposed of, four have already been sold in auction. The other two drills, namely the key stone drill No.II with boiler and calyx drill No.XII, without boiler, are lying in the compound of the Government Industrial School, Bellary, pending disposal.

2. The Superintendent, Government Industrial School, Bellary now requests that as the school has not yet been equipped with engineering models, the two drills mentioned

above may be transferred to the school for instructional purposes. The Superintendent proposes to dismantle several of the component parts of the drills such as (i) eccentric (ii) connecting rod (iii) cross head (iv) cylinder with piston and valves (v) sprocket chain and wheel (vi) toothed and bevel wheels and (vii) reciprocating pump, with a view to giving the students training in taking dimensioned sketches of the parts and enabling them to study the function served by each of them. The Superintendent considers that demonstrations of the working of the steam engine and boiler would be of great benefit to the students.

3. In the circumstances stated by the Superintendent, I recommend that Government may be pleased to permit of the transfer of the drills and the boiler to the Government Industrial School, Bellary. If later on it is found possible to equip the school with a suitable range of models the drills may then be disposed of.

Director of Industries.
